

Black Knight Risk Management

REGULATOR-GRADE JUDGMENT. OPERATOR-LEVEL EXECUTION.

FOR COLLEGES &
UNIVERSITIES

A university holds the data a bank holds, runs AI in systems students cannot opt out of, and trains the people who will defend both.

Black Knight Risk Management is a boutique advisory firm founded by a former OCC and NYSDFS IT and cybersecurity bank examiner. We work on two fronts: the institution's own cyber, AI, and vendor risk, and the readiness of the students it sends into those jobs.

WHAT WE DO

- ◆ **Incident Response Tabletop Exercises.** OPERATION DANGER CLOSE puts participants in executive roles during a live breach scenario and makes them decide under a clock. One class period, 5 to 30 people, and no lab, laptops, or software.
- ◆ **Guest Instruction and Executive Education.** Sessions on AI regulation and cyber risk for classes, student groups, and faculty, built as curriculum, not a talk.
- ◆ **AI Governance for Institutional Use.** Admissions, advising, proctoring, and tools adopted without telling IT, anchored to the NIST AI RMF and ISO 42001.
- ◆ **Information Security Program Assessment.** Review against the GLBA Safeguards Rule for student aid data, measured as we did inside banks.
- ◆ **Third-Party and EdTech Vendor Risk.** Oversight of the vendors holding your student data, including the models those vendors update without telling you.
- ◆ **Cabinet and Trustee Translation.** Technical risk stated as financial, operational, and reputational impact, in the language your trustees and general counsel use.

Next: a cyber resilience clinic with Netswitch, already at six universities, where students assess risk for small businesses and community groups.

WHY BLACK KNIGHT

- ◆ **We have sat in the regulator's chair.** Founded by a former federal (OCC) and state (NYSDFS) IT and cyber examiner with direct examination experience at institutions from under \$1B to roughly \$5T in assets.
- ◆ **We teach from real incidents.** The tabletop mirrors a 2023 file transfer breach that hit thousands of financial firms, revealed and debriefed at the close.
- ◆ **We build curriculum, not appearances.** Every exercise ships with a run-of-show, role assignments, a decision scorecard, and an assessment instrument. Satisfaction is surveyed and reported.
- ◆ **We know the campus side.** MS in Cybersecurity from NYIT, plus West Point and Army command of a 50-person, \$100MM defense program.

PROVEN RESULTS

- ▶ **Baruch College, CUNY.** Designed and facilitated OPERATION DANGER CLOSE for a full student cohort, with 100% participant satisfaction. Delivered with Sentricus.
- ▶ **Federal Whiplash, State Patchwork.** A three-part briefing series on federal and state divergence in U.S. AI regulation, delivered to 75 cybersecurity executives nationally.
- ▶ **New York Institute of Technology.** Invited after the Baruch delivery for a student exercise and a session in the School of Management High School Business Academy, December 2026.
- ▶ **Reach.** 175 executives, practitioners, and students across six engagements in 2026.

WHERE TO START

Classroom Tabletop

One class period. Any room. We supply everything and facilitate.

Guest Session

A 60-minute briefing for a class, a student organization, or your leadership team on where AI and cyber regulation is heading.

Program Conversation

A 30-minute call on where your institution's cyber, AI, and vendor risk actually sits, and what a first engagement would look like.

WHAT YOU GAIN

Students who have held a role and answered for a decision under pressure. An institutional risk picture written in plain terms. A partner who has run the examinations your peer institutions are starting to worry about.
